

ONS 2019 | San Jose

open source networking @ stores

Craig Dolezal | Jeff Strande
Target

why we're at ONS

- value of open
- freedom and flexibility
- longer view to move at our pace
- focus on features most meaningful to target

agenda

- 1 about target
- 2 connectivity strategy
- 3 challenges

- 4 keys to success
- 5 what we're building

1

about target

- 1,850 stores in the United States
- 39 distribution centers in the U.S
- 350,000 team members worldwide
- global offices in India, China, Hong Kong
- 30 million guests a week shop our stores
- 100 million guests a month visit our digital channels

stores as hubs:
a digital transformation

A photograph of a Target employee, a woman with short curly hair wearing a red Target shirt and a name tag that says "Nadia", smiling and interacting with a customer inside a car. The customer is a woman with long dark hair, also smiling, holding a smartphone. They are at a drive-thru location, with a red Target building and its bullseye logo in the background. A red shopping cart is visible to the right, and another car is parked further back. The scene is set in a parking lot with some trees and a cloudy sky.

**guest-centric engineering
= great guest experiences**

we embrace

- agile
- open
- learning

today's problem domain

- Constantly growing cloud footprint to facilitate hundreds of supporting web applications
- Constantly growing technical footprint in the store to provide a killer in-store experience
- Bridging the gap between the web experience and the in-store experience. Connecting our guests to the best possible experience, regardless of where they are shopping with us

(open source)

3

**our
challenges**

scaling for holiday 2018

- 2M unique guest Wi-Fi clients in a day
- 77TB of data transferred on guest Wi-Fi over two days

challenge

data center focus

challenge

People

4

keys to success

success enabler:

leadership support

success enabler:

Team

success enabler:

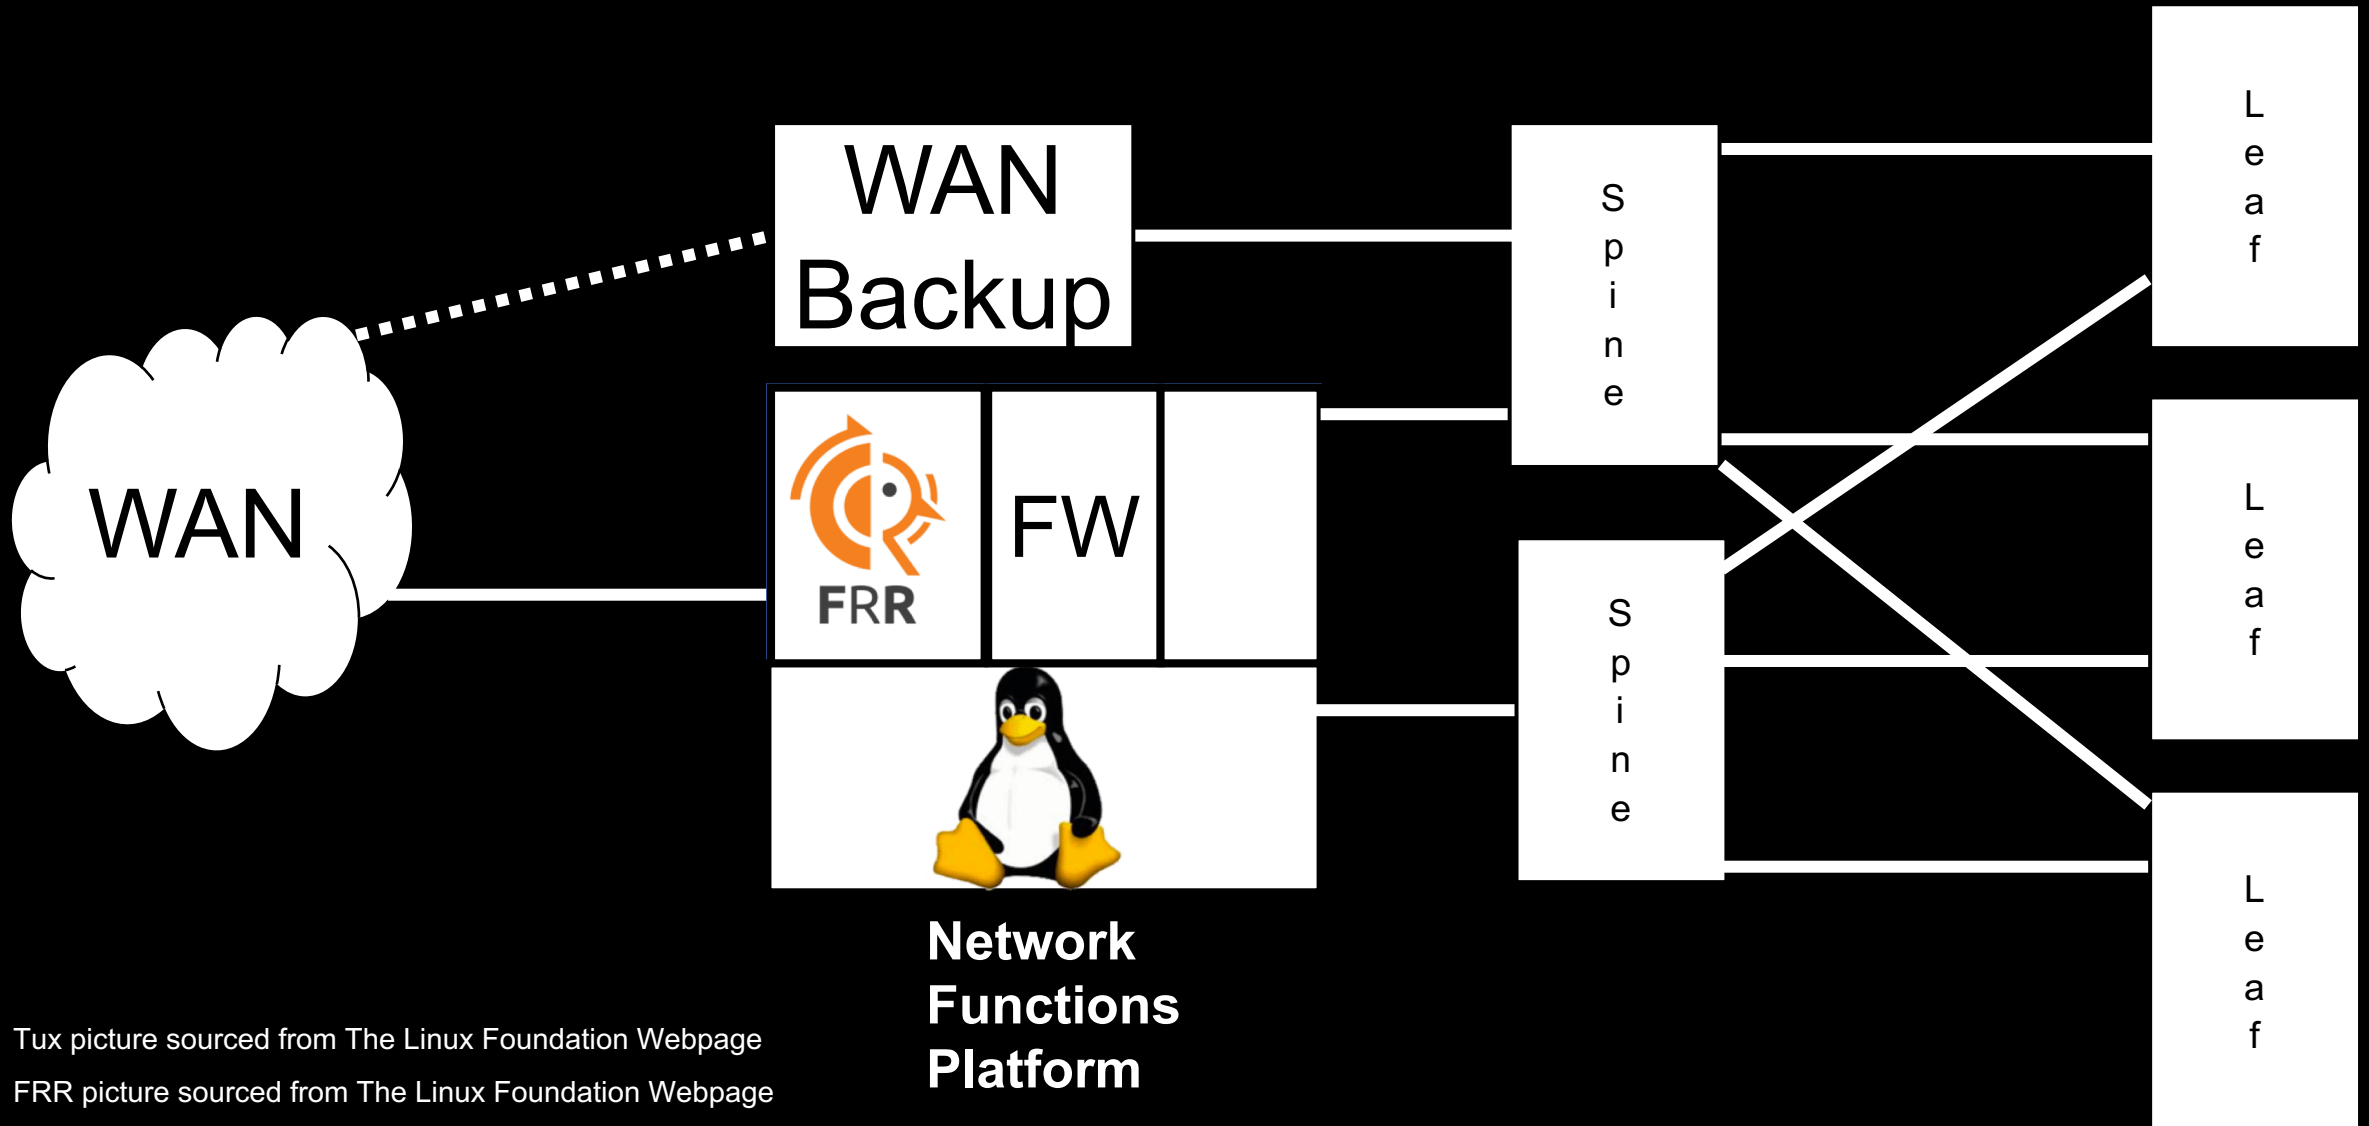

space
